

100%DEGREASING CONCENTRATE

Description:

100% Degreasing by Innovacar is a **multi-purpose and universal degreaser for vehicles**. It is ideal to energetically clean the engine compartment, rims and tyres, insects and rubber and plastic mats. It renews the surfaces and has an antistatic effect. Main features:

- **Universal multipurpose thanks to the combination of two features:** first, combining a specific chelating effect to deep clean rims and metal deposits; and second, a colloidal formula consisting of molecules with hydrophobic heads and hydrophilic tails, which promotes the penetration and cleansing of oils and greases, without the use of aggressive substances.
- **Concentrated:** even a small amount of product can degrease and clean, breaking up dirt and preventing marks from forming.
- **Safe and effective:** its formulation is ideal for all car surfaces such as the body, wheels, engine, interior and hard plastics, thanks to the use also of surfactants of vegetable origin and the absence of added sodium and phosphorus hydroxide, EDTA and NTA*. The absence of the latter also makes it gentle on precious materials.
- **Antistatic and dustproof effect:** it fights dust and its subsequent accumulation.
- **Final visual effect:** preserves the original finish of the treated surface without greasing.
- **Evaporates slowly = longer effect:** thanks to slow evaporation, the duration of the degreasing step increases, thereby extending the available time to work on the surfaces and reducing the possibility of residue caused by sudden drying.

* May contain traces.

Directions for use:

How to degrease and clean vehicle surfaces with 100% Degreasing.

The dilutions change according to the chosen format, whereas the methods of use vary on the different treated surfaces.

For the extraordinary cleaning of rims and tyres:

1. Wait until the surfaces are cold or cool them with water.
2. Spray the product and let it act for a couple of minutes.
3. In the presence of heavy duty dirt, consider using a nylon bristle brush or similar to treat the affected areas.
4. Rinse: you can rinse with high pressure water for stubborn dirt or when touchless cleaning is required.

To clean the engine:

1. Wait for the surfaces to cool.
2. Dispense the product and let it act for a couple of minutes.
3. In the presence of heavy duty dirt, consider using a brush to treat the affected areas.
4. Wipe a damp microfibre cloth to remove the product.

Cleaning hard plastic and internal surfaces:

1. First vacuum dust and dirt carefully.
2. Apply the product evenly, directly on the surface to be treated or, in case of heavy duty dirt, spray the product on a brush with soft bristles that will be used for it to be applied. If necessary, use a brush to remove the most stubborn dirt.
3. Wipe a soft damp microfibre cloth to remove the product.

For the routine cleaning of other parts:

1. Spray the diluted product on the surface.
2. First wipe a damp microfibre cloth and then a dry one.

For 100% Degreasing in the 500 ml ready-for-use format:

- **For the extraordinary cleaning of rims/tyres, engine and interior hard surfaces:** use the product undiluted.
- **For the routine cleaning of other parts:** the recommended dilution is 1:1; use 500 ml of product and add the remaining part of water (500 ml) to obtain 1 L of ready-for-use solution.

For 100% Degreasing in the 4.54 l concentrated format:

- **For the extraordinary cleaning of rims/tyres, engine and interior hard surfaces** : the recommended dilution ranges from 1:2 to 1:3; i.e. use 330 ml to 250 ml of product and fill the remaining part with water (670 ml - 750 ml) to obtain 1 L of ready-for-use solution.
- **If used as a pre-wash:** if applied with a precompression pump or bucket, the recommended dilution ranges from 1:20 to 1:30, i.e. use 50 ml to 30 ml of product and fill the remaining part with water (950 ml - 970 ml) to obtain 1 L of ready-for-use solution. If applied with a foam lance or foam gun: the recommended dilution ranges from undiluted to 1:2; use 350 ml of product and add the remaining part of water (650 ml) to obtain 1 L of ready-for-use solution. While dispensing, the actual final dilution can reach approximately 1:15 to 1:45.
- **For the routine cleaning of plastics:** the recommended dilution ranges from 1:10 to 1:20, i.e. use 90 ml to 50 ml of product and fill the remaining part with water (910 ml - 950 ml) to obtain 1 L of ready-for-use solution.
- **For the routine cleaning of fabrics:** the recommended dilution ranges from 1:5 to 1:40, i.e. use 150 ml to 25 ml of product and fill the remaining part with water (830 ml - 975 ml) to obtain 1 L of ready-for-use solution.

Precautions: do not spray or apply the product on hot surfaces. On particularly delicate parts it is always recommended to test the product on hidden parts of the vehicle.

Caution:

Observe the instructions in the safety data sheet when handling the product.

Technical features:

Appearance and colour: purple liquid

Odour: characteristic

pH: 10,2 ± 0,5

Flash point: >100 °C

Relative density: 1,03 g/cm³ ± 0,05

Solubility in water: soluble

Solubility in oil: insoluble

Storage:

Unopened and stored at room temperature away from direct sunlight.
